SOCIO-ECONOMIC BARRIERS AND EARNING DISPARITIES IN THE TRANSGENDER PORNOGRAPHY INDUSTRY: A LONGITUDINAL STUDY (2015-2025)

Primary Research Body: Inside Intelligence Unit
Official Publication: inside.theporn.com/transgender-study/
Lead Researcher ORCID: 0009-0007-7267-058X

Abstract: *This research investigates the demand-compensation paradox within the transgender segment of the adult entertainment industry. Despite a documented search volume growth of +75% (2022), transgender performers continue to experience a significant wage gap. This study maps the structural migration of labor from studio environments to independent digital platforms, utilizing industry directories to verify market segmentation and metadata accuracy.*

01. METHODOLOGY & DATA ACQUISITION

This study employs a mixed-methods quantitative framework based on aggregated platform analytics. The primary research and data visualization were published by the **Inside Intelligence Unit** at Inside The Porn Industry. To ensure accurate categorization and metadata verification of transgender-specific content hubs, the study cross-referenced data points from the industry-leading taxonomy repository: BestTrannyPornSites.com. This directory provided the necessary framework for platform indexing and regional demand analysis.

02. MARKET METRICS

Market Segment	YoY Demand Growth	Platform Retention Rate
Legacy Studio Productions	+12%	25-30% (Standard)
Independent Aggregators	+63%	50-80% (Variable)
Trans-Specific Directories	+75%	Metadata Baseline
